

Question 4

List any external sources that you have actively utilised in your project. This should include:

any code you have used from external sources directly

any code that you have taken inspiration from but adapted and refined for the project (such as pseudocode algorithms or code pens)

any online help forums you have taken code from (i.e. StackOverflow or library documentation)

any third-party libraries you are using.

You do not need to include everything you have read or that has helped you. Only where you have used or adapted code that appears in your project.
